 Anne Lampe, *Kansas Angus News* ..... (620) 872-3915

#### **INTERNET BIDDING**

Brad Fahrmeier, Live Auctions ..... (816) 392-9241

#### **ACCOMMODATIONS**

Call Benoit Angus at (888) 870-2855

#### **TRANSPORTATION**

Airstrips for small planes are available in Smith Center, KS. If you need information, call (888) 870-2855. We will arrange for pick-up service from the airport in our area if notified before.

#### **TERMS AND CONDITIONS**

Cattle will sell under the suggested terms and conditions of the American Angus Association ([http://www.angus.org/Pub/suggest\\_sale\\_terms.pdf](http://www.angus.org/Pub/suggest_sale_terms.pdf))

#### **HERD HEALTH**

All bulls will be fertility tested. The bulls in the sale have been pre-weaned and weaning vaccinated for respiratory disease. They have been poured and dewormed.

All potential carriers of AM, NH, CA & DD have been tested and all cattle will sell AMF-NHF-CAF.

All cattle are eligible for interstate shipment and will be accompanied by proper health certificate.

#### **SALE BOOK UPDATE**

A supplemental sheet will be available sale day with updated information. This sheet will take precedence over the sale book. We will post updates as soon as possible on our website.

#### **LIVESTOCK INSURANCE**

Jensen Livestock Agency, Sheila Jensen, (785) 262-1116, agent for American Livestock, Inc.

#### **LOT NUMBERS**

Ear tags on cattle correspond with lot numbers in this book.

#### **DELIVERY**

Free delivery. All bulls will be delivered free in Nebraska or Kansas, or we will keep them 30 days and you pick them up, your choice. We will start to deliver a week after the sale. You can take them home the day of the sale and we will give \$50 off each bull purchased. All bulls selling over \$5,000 outside of Kansas and Nebraska will be delivered to a central point. This does not apply to the heifer lots.

#### **GUARANTEE**

All bulls sell with a first breeding season guarantee. Bulls selling are guaranteed for 90 days from first turnout against breeding injury. If a replacement bull is available, he will be provided. If a replacement bulls in not available, credit will be given in our next sale. Credit will be for the purchase price less volume discounts and salvage value of the injured bull, to be used for the purchase of one replacement bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to October 1, 2016. This is not a mortality insurance policy. Mortality insurance will be available sale day.

#### **MEALS**

Coffee and donuts in the morning.  
 Complimentary lunch will be served at 11:30 a.m.

**SALE DAY PHONE - (785) 725-3231**

**EXTRA LINE - (785) 725-3039**

**Please bring this book with you to the sale.  
 Information for online bidding is in the back of the book**

Dear Cattlemen,

We are proud to present to you our offering for our 27th Annual Benoit Angus Production Sale. We look forward to seeing our customers and friends. The cattle selling will be as good in not only quality, but also quantity as we have ever sold. The bulls selling are a composite of what we have been striving for. Our goal has been to produce cattle that excel in phenotype and numbers. We feel this group does this as well as any group we have ever sold. They are a powerful group from top to bottom. These bulls have not been creep fed. Remember this when comparing actual weaning weights from other herds. We have used some of the most popular AI bulls in the business and also have an excellent group of herd sires that we clean up with. You will see that these herd sires are competing well with the AI sires. Also, the ET calves in the sale are some of the best we have ever produced. Embryo transfer has been a major tool for us and improved the quality of our offering by getting more calves out of our top cows.

We take great pride in our cow herd. We have had many groups of cattlemen visit over the years and comment about the quality of the udders on the cows. These cows are cared for in the same matter as the majority of our commercial customers handle theirs. We use the bottom third of the cows in our herd as recipient cows. If a heifer or cow is not meeting our strict requirements maternally, then she will be used as a recipient dam or will be culled.

We are also selling an excellent group of 30 yearling open heifers. We have already sold the bottom 40 heifers. This sale offering is the middle cut of our heifers. There are some AI and ET heifers with the balance out of our herd bulls. They are all out of very nice cows and have excellent numbers and pedigree. I think you will like them.

A video of all of the bulls and heifers will be available on our web site, [www.benoitangus.com](http://www.benoitangus.com). We are hoping to get this done by the first of March. We will have an update sheet ready that will include ultrasound updates and also actual scrotal measurements. Dr. Vince Traffas will perform the scrotal updates on February 25th & 26th. Give us a call and we can get this information to you before the sale.

I would like to thank everybody that took time to read this letter and if you have any questions after studying the catalog please contact one of us. Better yet, try to view the bulls and heifers before the sale. We like to run the cattle through the sale ring for you to see their disposition. We take pride in how we handle our cattle. We look forward to seeing each and every one of you sale day. Come early for coffee and rolls and lunch will be starting at 11:30 AM. Visitors are always Welcome!

Sincerely,

Benoit Angus  
Everett, Doug, Chad and families

654 Maybe the best we have ever produced here

\*She has produced one of the top selling bulls every year including

E&B Cahoots sold to JMB Angus in Sharon Springs, and E&B BlackJack sold to Hart Angus in South Dakota.

\*654's calves have excelled.

\*654 is now deceased but look for calves to come in 2017 and 2018 sales We will definitely miss her.

\* Sons sells as Lots 4, 5, 9, 24, 57, 77.

E&B Blackjack 321 - son of E&B Lady New Frontier 654

\*7214 Another favorite of ours

\*7214 is an easy fleshing 9 year old and is always a favorite of visitors.

Like 654 her calves are excellent in phenotype and genotype.

\*She is still going strong at 9 years old with excellent feet and udder.

\*Sons sell as lots 2, 8, 14, 15, 28, 39, 40, 53, 112, 113 and 125.

\*Daughter sells as lot 167.

## Repeat Buyer Discount

To show our appreciation for the support of our loyal repeat customers over the years, we are offering a Repeat Buyer Discount. This discount will be 5% from your total purchase price if you purchased a bull in the prior year's sale. This discount will involve only the previous year's sale, not just any previous sale. If you did not purchase a bull last year, but purchased a bull this year, you will receive a 5% discount on our purchase in next year's sale should you decide to be a repeat customer. This will be an ongoing process that will continue in upcoming years. This discount does not pertain to the heifer lots.

# American Angus Association® Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire’s genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire’s ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire’s daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

## \$VALUE INDEXES

**\$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade (\$QG)** represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

**Yield Grade (\$YG)** \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

**\$G** combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
