**INTERNET BIDDING**

Information for online bidding is in the back of the book.

TECHNICAL SUPPORT:  
**682.816.4900**  
TechSupport@LiveAuctions.tv

**ACCOMMODATIONS**

Call Benoit Angus at (888) 870-2855

**TRANSPORTATION**

Airstrips for small planes are available in Smith Center, KS. If you need information, call (888) 870-2855. We will arrange for pick-up service from the airport in our area if notified before.

**HERD HEALTH**

The bulls were fertility tested on February 16 & 17 and scrotal measurements were taken then. The bulls in the sale have been pre-weaned and weaning vaccinated for respiratory disease. They have been poured and dewormed.

All potential carriers of AM, NH, CA & DD have been tested and all cattle will sell AMF-NHF-CAF-DDF.

All cattle are eligible for interstate shipment and will be accompanied by proper health certificate.

**SALE BOOK UPDATE**

A supplemental sheet will be available sale day with updated information. This sheet will take precedence over the sale book. We will post updates as soon as possible on our website.

**TERMS AND CONDITIONS**

Cattle will sell under the suggested terms and conditions of the American Angus Association  
([http://www.angus.org/Pub/suggest\\_sale\\_terms.pdf](http://www.angus.org/Pub/suggest_sale_terms.pdf))

**LIVESTOCK INSURANCE**

Jensen Livestock Agency, Sheila Jensen, (785) 262-1116

**LOT NUMBERS**

Ear tags on cattle correspond with lot numbers in this book.

**DELIVERY**

Free delivery. All bulls will be delivered free in Nebraska or Kansas, or we will keep them 30 days and you pick them up, your choice. We will start to deliver a week after the sale. You can take them home the day of the sale and we will give \$50 off each bull purchased. All bulls selling over \$5,000 outside of Kansas and Nebraska will be delivered to a central point.

**GUARANTEE**

All cattle sell with a first breeding season guarantee. Bulls selling are guaranteed for 90 days from first turnout against breeding injury. If a replacement bull is available, he will be provided. If a replacement bulls in not available, credit will be given in our next sale. Credit will be for the purchase price less volume discounts and salvage value of the injured bull, to be used for the purchase of one replacement bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to October 1, 2023. This is not a mortality insurance policy. Mortality insurance will be available sale day.

**MEALS**

Coffee and donuts in the morning.  
Complimentary lunch will be served at 11:30 a.m.

SALE DAY PHONE (785) 725-3231

## BENOIT ANGUS – A Trusted Family-Owned Program!

Welcome to the 2023 Benoit Angus Annual Bull Sale. This year's event will be the 34th annual sale for the Benoit family and a sale offering that is as deep in quality as you will find anywhere in the entire breed. This family is 100% committed to producing fault-free, functional genetics that will add value to their customer's bottom line.

As you study this year's sale offering, you will find a set of bulls that have been developed to express their genetic potential yet maintain their functional traits to ensure longevity. These bulls are sired by the breed's leading AI sires and will be headlined with the first set of sons to sell by the Benoit-bred and popular Genex sire, E&B Wildcat 9402. Also selling will be a large number of paternal brothers to Wildcat, sired by EMAW. The Growth Fund sire group this year will be highlighted by a set of maternal brothers to Wildcat that will be as good as you will find. In addition to these sire groups, you will find sons of Tahoe, Resilient, Ashland, Exponential, and many more highly proven AI sires. These leading AI sires combined with the powerful, high maternal traits of the Benoit program will allow producers to select a set of bulls that will simply sire pounds and performance, as well as allow you to select a set of genetics to make front-end replacement females – this cow herd is as good as it gets!

There is as much excitement and optimism in the future of our business as most of us have ever seen. The stage is set for these bulls selling this year to sire multiple calf crops that will no doubt sell at a level that most of us have only dreamed of seeing. As we enter these exciting times in the cattle cycle and in the cattle industry, sourcing the right kind of genetics to put into your program will be the key to success. Top cattlemen have always looked to the Benoit program as a trusted source of genetics and the seats are always filled with repeat customers. For those of you who have never had the opportunity to invest in Benoit genetics, I would invite you to be with us Thursday, March 16th in Esbon, KS for what promises to be one of the most impressive bull sales to happen in the Spring of 2023. If you have any questions about the sale offering, please feel free to give me a call at 918-510-3464.

Sincerely,  
Rance Long  
(918) 510-3464

www.BenoitAngus.com

621 Hwy. 36 ~ Esbon, KS 66941

Thank you for taking the time to view our catalog for our 34th annual Benoit Angus Production sale. We are selling 165 bulls with 151 spring bulls 13-14 months of age and 12 older Fall bulls. All bulls have been dna tested and the results are included in there epd's. We also have ultrasound scanned each bull for carcass traits and these results are incorporated into the epd's also. Scrotal measurements will be taken on February 16-17 and these measurements will be sent to the AAA but are not updated in the catalog.

The bulls selling are a very stout group and have performed well. We feel this is as good of group as we have ever had to offer to you. The bulls have an excellent look to them with outstanding data to verify. Our primary goal at Benoit Angus is still focused on the maternal side with cow's that are raised very similar to our commercial customers in our area. They must be functional and perform with the least amount of problems possible. We do not creep feed our calves so all weaning weights are from there dams milk.

Videos of the bulls should be up by the first of March on our website at benoitangus.com or on the angus.org website. We will still be running the cattle through the sale ring on sale day to show their disposition and type at auction time. Give us a call if you have any questions about the offering. We always welcome visitors before the sale the view not only the bulls selling but also the dam that raised them. Thanks again for your interest in our program. Hope to see you soon. If you are unable to attend the sale, you will be able to view the sale and bid online at liveauctions.tv.

Sincerely yours  
*The Benoit's*  
Doug, Chad & Everett

# Fall Bulls

## Ref. Sire - GAR Discovery 6737H

BULL CALVED: 10/28/16 TATTOO: 6737 REG. 18749135

CED	BW	WW	YW	YH	SC

- EMAW is the now-deceased, long-time herd sire for the Benoit program, best known as the sire of the \$50,000 Genex sire E&B Wildcat 9402.
- EMAW consistently transmits breed-impacting growth traits and superior end product values to all of his progeny – he currently records 133 progeny with an average weaning ratio of 102 combined with YR 103@103 and most impressive is his 115 head of progeny with scan data earning an average %IMF ratio of 109 combined with UREA 115@100.
- His first 19 daughters in production have collectively weaned 23 calves with an average weaning ratio of 105.
- These EMAW sons will transmit extra payweight and carcass traits to obtain all of the premiums.

75 .46	1.34 .40	.98 .40	.009 .38	74	76	125	90	216	354

- One of the most exciting sires in the Genex lineup is the \$50,000 Wildcat whose first sons will lead off the Spring yearling bulls this year.
- With over 80 weaning weights recorded in his first calf crop, he has earned a weaning ratio of 101 combined with an impressive YR 9@104, %IMF 10@110, and UREA 10@103.
- His \$210,000 valued dam has earned an impressive ultrasound progeny record of %IMF 8@118 and UREA 8@101 combined with WR 3@107 and YR 3@103 – four of her sons sell including full brothers to Wildcat.
- Expect these Wildcat sons to provide calving ease with curve-bending growth traits and influential end-product values.

82 .67	.31 .64	.68 .60	.055 .64	70	93	127	34	162	280

- Growth Fund has been one of the breed's all-time heaviest-used AI sires and is one of the most popular bulls in the Select Sires lineup currently ranking among the breed's heaviest-used AI sires for the past fiscal year.
- His sons continue to be sale toppers throughout the country and include the \$150,000 lead-off son of Growth Fund in last year's Benoit Angus sale who joined the Select Sires lineup, E&B Rival 175.
- With over 8,000 progeny recorded, he has earned an average weaning ratio of 102 and with nearly 4,000 progeny with yearling weights, he currently holds the ratio of 103. In addition, 500 daughters have earned an average nursing ratio of 103 - Growth Fund is proving to be an impact sire in every aspect imaginable.
- This lineup of Growth Fund sons selling will be as deep and as good as you will find anywhere in the country.

- Tahoe has been one of the breed's heaviest-used AI sires and a long-time featured member of the Select Sires lineup.
- Utilize these sons of Tahoe to make long-lasting, beautifully designed replacement females as he is one of the breed's great maternal sires who now has 631 daughters in production combining for WR 882@102.
- Tahoe's sons will also consistently transmit added growth with super solid carcass traits as he is now of the breed's elite high accuracy sires with nearly 7,000 progeny recording an average weaning ratio of 102 over 3200 progeny recording a yearling ratio of 102 and with ultrasound scan data on 2,151 head he has earned an average %IMF ratio of 101 and a UREA ratio of 101.
- From calving ease to proven growth and added MB, he will be one of the breed's most influential sires of all time.

50 .79	1.17 .77	1.01 .74	-.022 .15	63	87	76	85	161	272

- Ashland has been one of the heaviest-used bulls in the Genex lineup consistently transmitting double-digit CED with curve-bending growth and superior end-product values. He does all of this while also consistently making smooth, eye-appealing progeny.
- He is a high-accuracy bull with over 5,000 recorded weaning weights earning an average weaning ratio of 102 combined with 3,000 yearling weights earning an average yearling ratio of 102. Plus, he excels with %IMF 3444@105 and UREA 3444@102.
- His first daughters coming into production are big-ribbed, deep-sided females with beautiful udders, and the 713 daughters have earned an average weaning ratio of 101 on 857 head.
- Cattlemen will appreciate all of the great attributes these Ashland sons have to offer and they are definitely on the top end of the sale offering.

55 .78	1.19 .76	.79 .72	-.015 .76	68	75	102	83	184	307

- Enhance is a past breed leader for registrations and has been one of the heaviest-used bulls in the ABS lineup.
- He is another high accuracy sire with nearly 12,000 weaning weights earning him an average weaning ratio of 101 combined with nearly 6,500 yearling weights earning an average yearling ratio of 102 and he excels for MB with %IMF 6067@103.
- For producers in search of bulls to inject elite MB without sacrificing growth and performance and with the added value of low birth, the Enhance genetics should fit those parameters.

- \*Recommended for virgin heifers or cows.
- \*Super growth and carcass on this ET Enhance son.
- \*Dam has been a tremendous producing cow with calves that look tremendous.

### E&B Lady Plus 517 - Dam of Lots 57-58 and 61-68

As a two-year old E&B Lady Plus 517 produced the \$25,000 top selling bull in our 2018 sale, E&B Sure Fire 741 selected by our neighbors, the Simmilink family and Koupal Angus in SD. E&B Sure Fire 741 has been the lead AI bull for the Simmilinks outstanding bred heifer program for the last several years and the reports on the calves have been outstanding. As a three-year old she produced the \$20,000 E&B Zion, purchased by the Genex AI Stud. Most recently, she produced a daughter who sold in the fall of 2022 to Deer Valley Farm as one of our high selling heifers. We identified the genetic power this female has to offer and her influence will be an impact for years to come - These 10 sons selling are outstanding and packed full of genetic merit!

- Resilient has seen heavy use throughout the breed due to his ability to transmit low birth and calving ease without sacrificing performance while also transmitting superb foot quality.
- He is a high accuracy sire with over 4,000 progeny recording an average weaning ratio of 102 combined with over 1600 progeny earning an average yearling ratio of 102 and his first few daughters in production are now posting an average nursing ratio of 108.
- Progeny of Resilient are smooth eye appealing individuals with as much body and rib shape as any sire group you will find - expect his daughters to be easy fleshing and the right kind to make replacements.

- Exponential is one of the breed's highest-growth sons of Casino Bomber available today and is a popular member of the ST Genetics lineup.
- His EPD profile is well-rounded from CED to growth and he pushes both MB and REA traits to the top of the breed while excelling for \$C value.
- In the performance program at Knoll Crest, he posted an impressive weaning ratio of 114 along with YR - 122 with %IMF - 107 and UREA - 117.
- Now with over 500 progeny reported he has earned an average weaning ratio of 102 along with nearly 250 yearling weights reported he has the yearling ratio of 102 while excelling in his ultrasound record with %IMF 213@109 and UREA 213@101.
- Expect these big-bodied, deep-ribbed sons of exponential to make a phenomenal set of replacements while also producing progeny that weigh heavy at weaning time and will also excel in any type of grid marketing system where quality is rewarded.

### Repeat Buyer Discount

To show our appreciation for the support of our loyal repeat customers over the years, we are offering a Repeat Buyer Discount. This discount will be 5% from your total purchase price if you purchased a bull in the prior year's sale. This discount will involve only the previous year's sale, not just any previous sale. If you did not purchase a bull last year, but purchased a bull this year, you will receive a 5% discount on our purchase in next year's sale should you decide to be a repeat customer. This will be an ongoing process that will continue in upcoming years.

- Intuition is one of the popular bulls in the ST Genetics lineup who offers a well-rounded EPD profile highlighted with added MB traits.
- He posted a very low birth ratio of 96 in the Sitz program and now his first progeny is maintaining an ultrasound progeny record of %IMF 35@101.
- For producers looking to invest in genetics to make replacements from while also increasing MB, the intuition sire group will be one to study.

• Playbook will no doubt go down as one of the breed's top female makers in recent time as he consistently transmits extra rib and added body shape to his progeny. His daughters are beautiful uddered females that all cattlemen appreciate.  
• Playbook sons are top low birth, calving ease sires who will not sacrifice performance and weaning weight.  
• He is backed by a dam who records BR 6@98, WR 6@109, YR 4@103, %IMF 45@106, and UREA 45@101. Plus, he has 18 sisters in production combining for WR 29@101.

20 .69	.63 .66	.64 .63	.005 .66	88	66	65	53	118	241

- Rainfall is one of the heaviest used bulls in the breed today making the top ten list for registrations the past physical year and he is without question one of the highly used bulls in the Select Sires lineup.
- Phenotypically, Rainfall himself is as smooth made as you will find and consistently transmits the extra eye appeal and overall smoothness to all of his progeny. He has also proven to be very solid and consistent in his ability to transmit added weight at both weaning and yearling time while also injecting added carcass values – with nearly 6,000 weights reported, he has earned an average weaning ratio of 100 and with 2,700 yearling weights reported, he has an average yearling ratio of 101 combined with %IMF 1816@104.

- A breed leader for registrations this breed impacting sire transmits low birth and calving ease with solid growth and performance and superior end-product values. With over 3,000 progeny recording ultrasound data, he earned an average progeny %IMF ratio of 108 and UREA - 101.
- Home Town has the ability to transmit the right type of body shape to make superior replacement females that will be easy fleshing while also transmitting muscle shape and dimension and a low birth package.
- His sons are smooth-made, deep-ribbed individuals packed full of carcass quality for those looking to market progeny in a value-based grid system.

- Quantum is a son of the proven G A R Momentum and consistently sires low birth calving ease progeny that excel for end product values.
- In addition to the added carcass values Quantum transmits, he also appears to be a top female maker for those in search of a set of bulls to make replacements from as his first 102 daughters in production have earned an average nursing ratio of 101.
- Cattlemen will appreciate the added rib and body shape from full rib to flank these Quantum sons possess.

83 .55	.74 .49	1.20 .49	-.034 .49	62	79	133	69	202	324

- Regiment has been one of the popular bulls in the Select Sires lineup this past year as he balances double-digit CED with curve-bending growth traits as well as excellent carcass values.
- He consistently is transmitting superb growth values to his progeny with his first calf crop coming in with over 900 weaning weights reported. He has earned an average weaning ratio of 102 and also records YR 318@104.
- Expect these Regiment sons to transmit an added growth curve to their progeny with extra payweight at weaning time.

E&B Lady Consensus 4141 - Donor Dam of Lots 158-160

- \*Recommended for cows.
- \*Sire of 2109. County Line is a good looking Growth Fund son we purchased from DVAR Angus.
- \*Dam is a very nice looking, good uddered Inertia daughter.
- \*Granddam is a sister in blood to dam of Select Sires bull E&B Rival.

# ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

*Aim High*

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

Only 1 in 4 non-parent Angus bulls qualify.

## Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit [CABcattle.com](http://CABcattle.com).

## American Angus Association \$Value Indexes

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

**Feedlot Value (\$F)**, an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

**Combined Value (\$C)**, an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

### EPDS DIRECTLY INCORPORATED INTO EACH \$VALUE

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

# Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they have recorded an average of 15 progeny, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

TRAIT	PROGENY EQUIVALENT	TRAIT	PROGENY EQUIVALENT
Calving Ease Direct	25	Pulmonary Arterial Pressure	17
Calving Ease Maternal	19	Hair Shed Score	8

## How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen or the HD50k by partner Zoetis. These images indicate animals for which genomic testing has been conducted and incorporated by AGI into GE-EPDs

# YOU'VE EARNED IT

You've made a significant investment in your genetics, but does the market recognize that? The AngusLink<sup>SM</sup> Genetic Merit Scorecard was created to objectively describe the genetic merit of your feeder calves. The scorecard gives buyers the confidence they need to pay more for your quality calves.

In 2022, users of the Genetic Merit Scorecard earned a **\$12.94/CWT PREMIUM** on average. Give us a call and we can help you earn what you deserve.

# DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

## DEDICATED TO DATA.

We devote extra time to collect maternal traits beyond those required to target greater performance and predictability. Our goal is to not only improve today's genetics, but also prepare for the future of the Angus breed.

## COMMITTED TO IMPROVEMENT.

Raising quality registered Angus cattle takes commitment and as your genetic supplier, we take that commitment seriously. That is why we believe a commitment to improvement starts with the female.

Commit to the female — commit to MaternalPlus®.
